Title : IBM Instana V1.0.243
Administration

Vendor : IBM

Version : DEMO

NO.1 How can you collect agent logs for further analysis?

- A. By asking users to describe the error messages they see
- B. By accessing the agent logs through the agent management console
- C. By guessing the potential issues without any data
- D. By physically inspecting each agent device

Answer: B

NO.2 In the context of CI/CD pipelines, what does the integration of third-party tools typically facilitate?

- A. Reduced collaboration among team members
- B. Increased manual intervention in deployment processes
- C. Enhanced automation and efficiency in software delivery
- D. Decreased visibility into the development process

Answer: C

NO.3 In modifying service naming rules, what aspects can be customized in Instana?

- A. Naming patterns based on service endpoints
- B. Using regular expressions for dynamic naming
- C. Assigning service names based on IP addresses
- D. Application-specific naming conventions

Answer: ABD

NO.4 Which of the following is a core capability of IBM Instana?

- A. Automated root cause analysis
- B. Real-time user monitoring
- C. Batch processing
- D. Data warehousing

Answer: A

NO.5 When installing the Instana backend on Docker, which of the following statements is true?

- A. The Instana backend requires a single container deployment.
- B. The backend can be installed without persistent storage.
- C. Network connectivity between containers is not necessary.
- D. Docker Compose can be used to manage the container deployment.

Answer: D

NO.6 How can service discovery and service naming rules be modified in Instana?

- A. By editing the global configuration file manually
- B. Through the Instana user interface
- C. Using an automated script via API
- D. By restarting the Instana agent

Answer: BC

NO.7 For optimal operation of Instana agents installed on servers, which of the following is crucial?

- A. Each server must be in the same subnet.
- B. Agents must have the ability to initiate outbound connections.
- C. The time synchronization must be disabled on the host.
- D. A static IP address must be assigned to each agent.

Answer: B

NO.8 What does checking the agent status typically help identify?

- A. The weather forecast
- B. The agent's current operational state
- C. Network speed tests
- D. Latest social media trends

Answer: B

NO.9 Which of the following settings can be configured for an Instana host agent?

- A. Data collection interval
- B. Automatic pausing in low disk space scenarios
- C. Host agent's logging level
- D. Agent's color in the UI

Answer: ABC

NO.10 What is a crucial aspect of managing API token permissions?

- A. Granting all tokens full administrative privileges by default
- B. Regularly updating tokens to grant broader access indiscriminately
- C. Ensuring that token permissions align with the principle of least privilege
- D. Distributing tokens freely outside the organization to promote transparency

Answer: C
