Title : **Selling HP Print Security 2020**

Vendor : **HP**

Version : **DEMO**

NO.1 What are HP Secure Managed Print Services (SMPS)?

- A.** a customizable service from HP that manages your print security from device hardening to deploying advanced security solutions across people, processes, and compliance
- B.** a service from HP that manages your print security from device installation to ACF solutions
- C.** a service from HP that deploys advanced security solutions for enterprise customers
- D.** a service from HP that manages your print security in a compliant way by providing white papers, best practices, 0-day protection, and training

Answer: A

NO.2 What happens when a malicious file is found by whitelisting on an HP printer?

- A.** The printer performs a firmware upgrade from the network repository.
- B.** An alert is sent to the customer's SIEM tool.
- C.** The printer restarts and displays an error message until the admin password unlocks it.
- D.** An alert is sent to HP to update the HP Security AI.

Answer: D

NO.3 What happens when a malware attacks an HP printer with Run-time Intrusion Detection?

- A.** A message is displayed on the screen, stating the printer will restart, and a CIS log is simultaneously sent to alert the security team.
- B.** A CIS log and error message are sent to alert the security team and the device restarts without a warning.
- C.** An error message is immediately displayed on the screen, stating an intrusion was detected, a CIS log and error message are simultaneously sent to alert the security team, and the device restarts.
- D.** An error message is immediately displayed on the screen and the device restarts in safe mode.

Answer: C
